Judge Whiting
Environment Court
Auckland

Tipapa
Greta Valley
24 May 2012

Your Honour

Meridian Energy Limited. Hurunui Wind.

I am writing with a request from Dr Daniel Shepherd who is the expert acting on behalf of the Glenmark Community Against Wind Turbines Society, and Tipapa Limited, on the matter of Health effects related to Hurunui Wind.

Dr Shepherd feels that there will be greater benefits arising at the Health caucus meeting on 30 May, to be held in Auckland, were he not the sole representative acting for the Society and Tipapa. In addition there is a possibility that he may be disadvantaged. The reason being that Meridian Energy will have acting for them, and present at the caucus meeting, three health experts Dr Black, Dr Petrie, and Tanya Breen.

He has requested that the Court approve the appointment of an additional health expert to act on behalf of the Glenmark Community Against Wind Turbines Society, and Tipapa Limited. This is fully supported by the Society and Tipapa.

He wishes to have appointed Dr David Welch whose brief CV summary is below. Dr Welch has agreed to attend and act for the Society, and Tipapa.

David Welch is Senior Lecturer in the School of Population Health, University of Auckland. He has a background in Psychology, Physiology, and Epidemiology, and has taught extensively on the topic of Research Methods. David has written peer-reviewed articles in international journals, mostly in health research and epidemiology. He has also delivered many oral and poster presentations at conferences. Other than skills in academic writing and data presentation, his strengths are the design of research, questionnaire design, the statistical analysis of data, and data management.

Thank you for your consideration.

Yours sincerely,

John Carr

On behalf of Tipapa Limited
