

Township Sewerage Scheme

Appl. No _____

Val. Roll No _____

Applicant Details:

Name of Applicant: _____

Postal Address: _____

Phone Number: _____

Email: _____

Connection Address: _____

Legal Description: _____

Hereby make application for connection to the **AMBERLEY** Sewerage scheme, **Osborne Road Extension** [for properties east of 55A and 56 Osborne Road inclusive]

I submit herewith the capital contribution of \$4,700.00 (including GST) (\$1,540.00 as a lump sum payment for share of the extension costs, plus \$3,160.00 as a contribution towards the scheme upgrading in accordance with the District Plan)

1. Where a property has been paying sewer rates, and that property is then subdivided, each additional allotment created is liable for a capital contribution to be paid to the scheme.
2. Where an additional self contained building unit is required on a property which has been paying sewerage rates, each additional building unit will be liable for a capital contribution to be paid to the scheme.

In addition to the above the subdivider is responsible to extend the sewer reticulation from the main sewer line to the boundary of each allotment, or to provide easements if applicable.

In the case of additional building units, extensions of the sewer reticulation will generally be allowed when the building drains are to be connected to the scheme.

In addition to this form, a connection form and fee will be required before final connection is made.

Plan of proposed sewer lines from boundary to the sewer main attached? YES/NO.
