1. Draft Adaptation Pathways.

The Motunau Beach Coastal Adaptation Plan belongs to your community. It's important you are happy with the plan. The options below have been chosen by the community. We are coming back to you to ask for your preferred option/s and for your feedback. These options are identified in the pathways map below, in the attached document, and also on our website at www.hurunui.govt.nz/environment/MotunauBeach

Do you agree with the options identified in the draft Adaptive Planning Pathway?

Do you have a preferred adaptation pathway?

Implementation

1.1 Triggers:

We want to keep as many options on the table as possible until it's time to act but it's important we act before the risk of the hazard becomes too great. Triggers are proposed to track how the hazards are changing. These are indicators that the current situation is worsening to the point it's no longer acceptable. The proposed triggers are set out on pages 19 and 20 of the Motanau Beach Coastal Adaptation Plan, available at www.hurunui.govt.nz/environment/MotanauBeach, attached to this document and summarised below.

Dwelling is within 17m of the edge of the cliff:

Requested Changes:

Are there any additional triggers that you would like to see implemented in the Coastal Adaptation Plan?

2. Actions:

Actions to support the delivery of the Adaptation Plan are set out in pages 22-23 of the Coastal Adaptation Plan attached to this form. One of the proposed actions is to introduce a small, targeted rate to fund the construction of a rock revetment wall if required in future.

Are there actions you would like recorded as part of the plan?
