

HOW TO PREPARE YOUR LDPE BAGS

The Agrecovery LDPE recovery programme allows farmers and growers to responsibly recycle approved No.4 plastic bags for free. Bags must be 10-25kgs and from participating brands. Please follow the steps below to properly prepare your bags for recycling.

1

CUT ALONG THE TOP OF YOUR EMPTY BAG

Cutting along the top makes it easier to remove any excess residue from the bag

2

TURN BAG UPSIDE DOWN AND GIVE IT A GOOD SHAKE

Ensure the bag is clean and free of residue, dirt and contamination - both inside and out

3

PUT EMPTY BAG IN AGRECOVERY LINER SUPPLIED

Liners will fit about 100 bags - when full, seal the liner with the coded Agrecovery zip tie provided

4

DROP FULL LINERS OFF AT COLLECTION SITE

Please visit the Agrecovery website for a list of the collection sites in your region

All LDPE bags and liners will be inspected before they can be accepted. Please contact Agrecovery to order additional liners and coded zip ties.
