Subject: Re freedom. Camping

Thank you to listening to what others think No 1...To bring revenue to the area freedom campers spend on average round \$200 each time they stop..proven stats.

Wal-Mart in USA was marketed for campers who could stay couple nights..

These businessmen saw the potential they bought to their business.

History proves this through out the years

No2....Also they will stop some where and it's better to have designated spots marked out so they can be regularly checked.

No 3 ...We know they not rate payers but kiwis pay rates somewhere.

Thanks for you're time
LINDA n Donald Muirhead
