4. The specific parts of the application that my submission relates to are: *

The poles that would be erected and higher than the 8 metre allowance have no bearing when they are placed in a forest. It is unlikely any noise will unduly disturb Hanmer residents as the location of the proposed site is facing away from the village.

Due to the compact nature of the Hanmer Springs township, most people will walk from the township to the Flyride.

The Hanmer Springs design standards quire possibly need a general overhaul, as some of the criteria for buildings is out of date and has not evolved with the times. Steel poles are fit for purpose, stronger (covering off more recent H and S criteria) and can be easily painted to blend into the natural environment.

I support the Flyride proposal. Hanmer Springs, along with the greater Hurunui has the opportunity to have a unique first in New Zealand which encourages people to embrace the great outdoors and physical activity while showcasing the areas natural beauty. This type of outdoor activity goes hand-in-hand with the area's signature forest walks, bike tracks and thermal pools for well being.

The applicant has proven they can deliver a world-class activity (with the thermal pools) showing thought and consideration to the visual and natural environment.

The Flyride will help promote Hanmer Springs as a fun, healthy and interactive place to visit, ensuring the vibrancy of the area and being a place of choice for visitors. This, in turn, provides jobs and livelihoods for the local people.
